

Aashay Desai

Senior Product Manager, Developer Platforms · former Partner Engineer and Software Engineer

Orange County, CA · aashayd@gmail.com · linkedin.com/in/aashaydesai · aashay.com

SUMMARY

Nearly two decades turning developer pain points into platform products. Engineer, then Meta's first commerce partner engineer, now the PM who rebuilt developer support around LLM agents.

EXPERIENCE

Meta Menlo Park, CA 2016 – Present

REALITY LABS

Senior Product Manager, Developer Support Platform 2026 – Present

- Rebuilt **Feedback Center** as an agentic AI system: AI agents triage every developer report and route it straight to the engineers who own the fix, cutting processing from one week to three minutes and removing \$500K in annual operating cost.
- Building the agentic platform beneath developer support, moving VR and Horizon reports from intake to resolution and bringing ticketing, bug reporting, and feature requests onto one system.
- Lead product for AI agent evaluation, measuring agent quality against real developer outcomes.

Product Manager, Developer Support Platform 2024 – 2026

- Pitched, funded, and grew Meta's developer support platform from a side project into a staffed platform spanning several products.
- Launched **Feedback Center**, a public board where developers vote on platform issues, with agentic AI triage at intake; aligned 15+ cross-functional teams to ship.

Product Manager, Presence Platform 2021 – 2024

- Led third-party engagement for the launch of Meta's machine perception and AI platform for AR, VR, and MR developers; onboarded 20+ game studios.

COMMERCE

Product Manager, Commerce Platform 2020 – 2021

- Owned the roadmap and backend APIs for Meta's Commerce Platform across Shopify, BigCommerce, and ChannelAdvisor, leading a 10-person team of engineers, designers, and product marketers.

Partner Engineer, Commerce 2016 – 2020

- Served as Meta's first commerce partner engineer, embedded with Shopify, BigCommerce, and WooCommerce to ship integrations, now called Forward Deployed Engineering. Launched Instagram Shopping checkout and Marketplace automotive integrations, driving billions in commerce revenue.

Clever · Developer Relations / Partner Engineer · San Francisco, CA 2014 – 2016

- Led technical partnerships and DevRel; shipped REST and OAuth2 integrations with Scholastic, Instructure, and Amazon serving millions of K-12 students.

Earlier · Senior Software Engineer, Cotap, 2014 · Web Operations Engineer, Inkling, 2011 – 2014

Salesforce · Senior Member, Technical Staff · San Francisco, CA · 2008 – 2011. Helped build Salesforce's first REST API (Apex REST) and the Streaming API during the Force.com platform expansion. Before that, Senior Consultant, Junction Solutions, 2007 – 2008.
